

TecPen Display

HANDHELD SYSTEM FOR QUALITY
AND PRODUCTION CONTROL FIELDS

Bluetooth and USB connectivity

FEATURES

- Optochemical O₂ sensor system with display for gaseous media
- Invasive measurement in closed containers
- Integrated display with data logger - 32 Mbytes
- Data transfer via Bluetooth to Android systems (tablet, mobile phone) and via USB interface as CSV files
- Sensor factory calibrated
- Short measuring time approx. 3 s
- Self-diagnosis

APPLICATIONS

- Food industry control of Modified Atmosphere Packaging
- Pharmaceuticals and biotechnology
- Biochemical and molecular biology research
- Hygiene – detection of growth of (pathogenic) microorganisms
